The disclosure is objected to because of the following informalities: In the copy of the specification as filed, individual letters are missing in various words throughout, such as “often” on page 1, line 18, and “the” on page 1, line 22. It is recommended that a substitute specification be filed in conformance with MPEP § 608.01(q) (including a statement that the substitute specification includes no new matter) in order to fill in the missing letters.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 4 lacks a transitional phrase (MPEP § 2111.03), so it is unclear whether unrecited additional components are excluded from the scope of the claim. In claim 4, lines 1 and 3, “or related purposes” renders the claim indefinite as to the scope because it is not clear what the Applicant intends to cover by the recitation “*related* purposes” (emphasis added); attention is directed to MPEP § 2173.05(b), especially sections *C* and *F*. Similar problems occur in claims 5 and 6.

Claims 4-13 would be allowable if rewritten or amended to overcome the rejections under 35 U.S.C. 112, 2nd paragraph, by deleting the language “or related” (all occurrences) and adding an appropriate transitional phrase.
